## LAST MEETING 2017

57 people attended the meeting in Chinandega. All of them representing different Learning Centers.

A bus took us from Wisconsin Office in Managua. We appreciate the effort that participants made to be there very early in the morning. We had the chance to know other places where learning Centers develop activities.

Alba Rosa from Chinandega welcomed us and telling us to get ready because the meeting will be productive, and it has surprises.

## Evaluation

### Tell us what you think!

All workshops organized by Wisconsin are important because it strengthens our capabilities, teaches us to optimize the materials that are donated to us. It allows to socialize and exchange experience, to improve our communication and allow us to create self-employment.

All learning activities are very important because we learn many good things to improve our work, get ahead and support the community. We now can develop our own projects.

Wisconsin Nicaragua Partners is the place where we learn new things and share experiences with the leaders. In each meeting we are informed with all the activities that we can develop in our communities.

We have done great activities for our communities, somehow, we have helped them to change their lives, to challenge themselves and the most important thing is to help each other.
